

## TABLE OF CONTENTS

Haretu's contribution to the n-body problem	
Tudor Ratiu .....	1
Some fixed point theorems in uniform spaces	
M. S. Khan and T. Kubiak .....	9
Supernormal cones and absolute summability	
G. Isac .....	17
On the uniqueness of solutions of nonlinear boundary value problems	
A. R. Aftabizadeh .....	33
Almost periodicity of compact solutions for operational-differential equations	
S. Zaidman .....	43
On variational treatment of nonlinear Hammerstein equations	
Dan Pascali .....	47
On stability properties which are equivalent to Riemann hypothesis	
V. M. Popov .....	55
Ultimate behavior in certain nonlinear feedback systems	
C. Corduneanu .....	63
Sharp error bounds for a class of Newton-like methods	
Florian-Alexandru Potra .....	71
The boundary integral equation method in the problem of bending of thin plates	
Christian Constanda .....	85
Une methode d'integration numerique d'un systeme canonique d'equations differentielles	
Ilie Popescu .....	103

A new algorithm for the computation of the geodetic coordinates as a function of earth-centered earth-fixed coordinates	
Lawrence O. Lupash .....	112
Two-dimensional analysis of a hydraulic turbine with helicoidal blades	
Ion Paraschivoiu .....	121
A combinatorial approach to the theory of the bargaining sets	
Irinei Dragan .....	133
Miscellanea .....	151
