A nonlinear boundary value problem in the theory of deflections of spherical caps by <u>R.Kannan and J.-Y. Shin</u>	1
Nonlinear boundary value problems involving abstract Volterra operators by <u>Mehran Mahdavi</u>	17
Some simple criteria for starlikeness and convexity by <u>Petru T.Mocanu</u>	27
Rings with an almost division algorithm by <u>Amir R.Rahimi</u>	41
Compact self adjoint operators and existence of solutions to singular nonlinear boundary value problems in a real Hilbert space by <u>Donal O'Regan</u>	47
On a numerical algorithm for approximating the solution in the theory of Mindlin plates by <u>Christian Constanda and Dan Constanda</u>	69
Error estimates for finite element approximations of second order elliptic problems having inhomogeneous essential boundary conditions by <u>D.M.Bedivan and G.J.Fix</u>	77
On some new discrete inequalities related to a certain integral inequality by <u>B.G.Pachpatte</u>	85
Gale's feasibility theorem on network flows and a bargaining set for cooperative TU games by <u>Irinel Dragan</u>	99
Existence d'une solution presque-periodique d'une equation integrale a retard dans un espace de Hilbert by <u>K.Ezzinbi and E.Ait Dads</u>	113
Asymptotic equivalence of difference systems by <u>Rigoberto Medina and Manuel Pinto</u>	121
Optimal control of an elliptic governed problem by <u>V.Barbu and N.H.Pavel</u>	131
Abstract Volterra equation with initial point data by <u>Yizeng Li</u>	141
Some mountain climbing techniques in the theory of semilinear operator equations by <u>Dan Pascali</u>	155
Finite cyclic groups with two or more generators by <u>Marion E. Moore</u>	171
Euler's method for a first order partial differential equation by <u>H.Poorkarimi</u>	173
Two examples in LQ-optimal control theory by <u>Zephirinus Okonkwo</u>	177
