Methods of Solving Optimization Problems and Linear Equations in the Space of Fuzzy Vectors, by <u>Dan Butnariu</u>	1
On the Constructibility with Ruler and Compass of a Minimum chord in a parabola, by <u>Nicolae Anghel</u>	9
Some Remarks on Analytical Functions, by <u>Constantin Marinescu</u>	13
Hyperbolic Functional Differential Inclusions in Hilbert Spaces, by <u>Abdelhaq Sghir</u>	21
Bounded Solutions of Systems with Impulses, by <u>Raul Naulin</u>	29
Connectors of Bifurcating Equilibria of Planar Homogeneous Differential Systems, by <u>S.R. Bernfeld</u>	39
Univalence of Certain Integral Operators, by <u>Horiana Ovesea</u>	55
Differential Mean-Value Properties for Half-Continuous Functions, by <u>Mihai Turinici</u>	61
Counterexamples in Maximal Dynamic Flows, by <u>Eleonor Ciurea</u>	77
Existence of Solutions of Stochastic Integral Equations Using Integral Contractors, by <u>K. Subramanian and K. Balachandran</u> ..	89
On Manifolds Endowed with a T-Killing Almost Constant 2-Structure, by <u>I. Mihai and R. Rosca</u>	101
Iterated Sums of Polynomial Divisors, by <u>J.T.B. Beard, Jr.</u> and <u>M. Leanne Link</u>	111
Coatomic Lattices and Related Abelian Group Topics, by <u>Grigore Calugareanu</u>	125
Une Methode de la Theorie d'Extrapolation pour Resoudre des Equations Differentielles a Retard, by <u>B. Amir and L. Maniar</u> ..	133
Sample Controllability of General Nonlinear Stochastic Systems, by <u>J.P. Dauer and K. Balachandran</u>	143
Recession Methods for Noncoercive Variational Inequalities by <u>Liliana Grație and Dan Pascali</u>	155
The Circulant Graph. Applications, by <u>Stefan Antohe</u>	165

On a Separable Nonlinear Volterra Integral Equation with Power Nonlinearity, by <u>Merlynd Nestell and M.Ghandehari</u> ..	175
M i s c e l l a n e a	183
(List of Mathematicians and Computer Scientists of Romanian Extraction, Residing Outside Romania; The Bylaws of the American Romanian Academy of Arts and Sciences; From the Bookshelves; Florin Vasilescu (1897- 1958); Personalia; A letter from Sweden; Authors of vo- lume XVII)

Libertas Mathematica is the mathematical journal of the American Romanian Academy of Arts and Sciences. It is published once a year, as a volume of 200-250 pages.

Authors interested in publishing papers in the journal are asked to submit the manuscript in usual form (typewritten or word-processed). If the paper is accepted, instructions will be provided for the production of a camera-ready copy. It is our advice to submit only paper in the range 12-15 pages.

Reprints are available at the cost of \$ 1 - 2/copy. Order must be placed at the time the final form of the paper is submitted.

Subscriptions must be paid for by April 1st of the year in which the volume is scheduled for publication. The cost per volume is

\$ 70.00 institutional,

\$ 35.00 individual.

Back volumes are available at the cost of \$ 50.00 each, and \$ 30.00 for individuals. Check/Money order must be made payable to American Romanian Academy, and mailed to the address:

LIBERTAS MATHEMATICA
